

water at its finest™

worry-free water

- Fresh tasting water, coffee and beverages
- Advanced filtration and contaminant adsorption system reduces sediment, rust, chlorine taste and odor, lead, MTBE (a fuel additive), and VOCs (Volatile Organic Chemicals) including some pesticides and carcinogens that may be present in the water supply
- Sanitary Quick Change filter cartridges for easy installation and service — no spills, no mess
- Compact, integral design eliminates costly plumbing components and fittings for an economical installation and long-term, hassle-free maintenance
- 1/4 turn quick-change filter design eliminates risk of injury and physical challenges associated with undersink appliance maintenance
- NSF Certified and listed for contaminant reduction

Convenience... eliminate the need, the cost and the hassle of bottled water! 350 one-gallon water bottles will end up in your recycle bin for every one FM-350 DWS filter replacement. That's 70 five-gallon delivered bottles in and out of your home! And there is no deposit required! Public or private well supply, Water Factory Systems® ensures that only clear, fresh water flows from your tap.

Application:

Chlorine Taste & Odor
Sediment VOCs
MTBE Cyst
Turbidity Lead

Advanced contaminant adsorption technology

Exclusive quick change filter design

FM-350 DWS Drinking Water System

Drinking Water System

advantages OF THE FM-350 DWS SYSTEM

- Conveniently dispenses healthy purified water for all water-based cooking and consumption
- Sanitary Quick Change System
 - safe, clean filter replacement eliminates handling filter media
 - as easy to change as a light bulb
- Capable of providing filtered water to multiple water-using appliances:
 - kitchen and bar sinks, lavatory, hot-water dispensers and refrigerator/icemakers
- The FM-350 DWS reduces:
 - sediment
 - chlorine taste and odor
 - MTBE (gasoline additive)
 - cyst
 - turbidity
 - lead
 - VOCs (Volatile Organic Chemicals) including some pesticides/herbicides

COMPARE YOUR OPTIONS

Water Cooler	Bottled Water	Pour Through Pitcher	Filter in Faucet	FM-350 DWS
<ul style="list-style-type: none"> • Expensive • Heavy 5 gallon bottles weigh 40 lbs (18.1 kg). Risk of injury and spills • Water delivery – by homeowner or more often by diesel engine (leaded fuel) trucks • Storage required for both full and empty bottles • Awkward placement. Clash with high-style decorative kitchen designs • Often requires electricity • Limited usage – not practical for food preparation • Cannot supply other water using appliances 	<ul style="list-style-type: none"> • Expensive • Heavy and cumbersome • Difficult to transport • Requires frequent trips to market • Storage space required • Limited usage – not practical for food preparation • Cannot supply other water using appliances • Bottled water not necessarily "safer" than ordinary tap water¹ <p>¹ National Resources Defense Council (NRDC)</p>	<ul style="list-style-type: none"> • Frequent filter replacements with yearly costs above \$75¹ • Limited volume – complaints of constant filling which can take up to 20 minutes • Pitcher requires continuous cleaning, takes up space on counter or inside refrigerator • Limited usage – not practical for food preparation/cooking due to limited capacity • Clogs easily – even slower drip filtration plus shorter filter life • Cannot supply other water using appliances <p>¹ Consumer Reports, Aug 2000</p>	<ul style="list-style-type: none"> • Frequent filter replacements with yearly costs above \$90¹ • Short filter life: 200 gallons (757 liters) • Awkward styling: low decorative appeal • Lower flow rates (0.5 gpm/1.89 lpm) than faucet mount styles • Clogs easily – even slower flow rates with shorter filter life • Cannot supply other water using appliances <p>¹ Consumer Reports, Aug 2000</p>	<ul style="list-style-type: none"> • Economical • 350 gallon (1,325 liter) filter life • Easy filter replacement: no tools required • Separate faucet dispenses filtered water on demand • Can service other water using appliances: refrigerator water/ice, hot water tap, bar sink • Comprehensive VOC reduction health related claim, verified by third party regulatory agency • Higher flow rates (0.6 gpm/2.73 lpm)

Do not use with water that is microbiologically unsafe or of unknown quality without disinfection before or after the system.

Systems verified for cyst reduction may be used on disinfected water that may contain filterable cysts.

Visit www.nsf.org for the claims associated with products that are NSF listed.

Made with pride in the USA.
